¹ Participants who joined the Scheme prior to 1 July 2016 and those with initial plans approved after the end of 2022-23 Q1 have been excluded.

² Plans less than 31 days in duration have been excluded from this tabulation, as these reassessments are more likely to represent corrections to the plan rather than a new plan reassessment to address a change in circumstance.

³ The number of CALD participants excludes First Nations participants.

⁴ The Outcome results include participants who have been in the Scheme for at least two years. Trial participants are excluded. Except for the parent and carer employment rate, only participants aged 15 and over are included. The Baseline results are at Scheme entry.

⁵ Participant employment rate metric includes results for participants aged 15 to 64.

• The NDIA commenced measuring performance against the PSG metrics prior to the legislation of the Participant Service Charter and Guarantee. On 30 March 2022, the NDIS Amendment (Participant Service Guarantee and Other Measures) Bill 2021 passed in both houses of Parliament, and received Royal Assent on 1 April 2022. 'n/a' means that PSG results cannot be measured.

¹ PSG results in the previous quarter may be restated due to ongoing logic refinement and changes in data quality.

Inflation within a plan, between reassessments (current quarter % per annum)	6.5%	8.9%
Socioeconomic equity (%) ⁵	99%	98%

- Total annualised plan budgets at 31 March 2023 were \$648m and payments from 1 July 2022 were \$393m.
- The number of active providers at the end of March is 1,044, growing by 7% in the quarter.
- Utilisation has been 75% from 1 July 2022 to 31 December 2022, with 17% (1 out of 6) of service districts in Northern Territory more than 10 percentage points below the adjusted national benchmark.
- In 50% (3 out of 6) of service districts, the top 10 providers provide more than 70% of payments.

Distribution of service districts by plan utilisation ²

Distribution of service districts by market concentration

Service districts more than 10% below plan utilisation benchmark:

- East Arnhem: 57% vs 72% benchmark

Service districts above the market concentration benchmark:

- Barkly: 80% vs 70% benchmark
- Katherine: 79% vs 70% benchmark
- East Arnhem: 75% vs 70% benchmark

¹ Active providers refer to those who have received payment for supports provided to Agency-managed participants and plan managers.

² The 'benchmark' in this analysis is the national average after adjusting for the proportion of participants in Supported Independent Living (SIL) in each service district and the length of time participants have been in the Scheme.

³ Total annualised plan budgets refer to those in the current plans of active participants at the end of quarter.

⁴ Total plan inflation consists of plan budget changes occurring at plan reassessment as well as changes occurring within a plan between reassessments.

⁵ Socioeconomic status uses deciles from the ABS Index of Education and Occupation (IEO). A higher decile indicates that people residing in that area have a higher level of skills and qualifications on average. The socioeconomic equity metric is equal to the average annualised plan budget of participants residing in the top two IEO deciles divided by the average annualised plan budget of participants residing in the bottom two IEO deciles (participants not in SIL and aged 0 to 64).
